Kombi

CLASSIC

CRISP AND WELL DEFINED LINES
WITH EVERY MARK

Kombi

CLASSIC

Features Include

- 1.5 up to 6" Line marking width
- 25 Litre (6 gallon) paint tank
- 5 Litre (1.5 gallon) water tank
- Centre or side marking
- SLA battery
- Stainless steel chassis
- Diaphragm pump
- LRR non puncture tyres
- Adjustable handles & bar ends
- Adjustable switch
- Life time warranty available

The Kombi Classic gives crisp, well defined lines with each mark. The adjustable tool-less quick fit wheeled knib means the Kombi Classic can be used on a variety of sports surfaces such as; natural grass, concrete, asphalt, wood, artificial grass, rubber track and EPDM straight out of the box.

After marking the knib can be lifted off and situated on to the bonnets tapered stem for easy transportation. Heavy duty adjustable stainless steel handle bars to suit all user heights along with an anchor point to make marking circles easy and hassle free.

When used with Fleet's range of marking liquid there is no need for external mixing: the paint disperses into the water immediately in the 25 litre tank. At the end of the day's marking, and just a flick of a switch, the Kombi flushes clean water, drawn from its rear water tank, through the nozzle assembly, thus eliminating expensive pump and nozzle blockages.

Kombi

ORANGE

TWICE THE POWER
OF STANDARD MODELS

Kombi

ORANGE

Features Include

- 1.5 up to 6" Line marking width
- 25 Litre (6 gallon) paint tank
- 5 Litre (1.5 gallon) water tank
- Centre or side marking
- Lithium battery with docking station
- Control panel
- Pressure manifold with read out
- Stainless steel chassis
- 80 PSI pump
- LRR non puncture tyres
- Adjustable panel, handles & bar ends
- Life time warranty available

The Kombi Orange boasts all the features of the Kombi Classic with added power and resources. At the heart of machine is our latest heavy duty lithium battery capable of twice the power of standard models, this coupled with an 80psi pump allows for the most powerful Kombi spray machine yet.

The adjustable tool-less quick fit wheeled knib means the Kombi Orange can be used on a variety of sports surfaces such as natural grass, concrete, asphalt, wood, artificial grass, rubber track and EPDM straight out of the box. The new removable heavy duty battery (twice as powerful as standard) will give an 8-hour marking session before having to be re-charged and includes a docking station for ease of use.

Heavy duty adjustable stainless steel handle bars to suit all user heights with an adjustable control panel which can be adjusted to suit left & right handed users. The control panel shows battery status and sports a new LED ON/OFF switch for instant shut off. A pressure adjustment manifold with pressure gauge read out is also included allowing accurate control over paint usage for all types of application.

LASER GUIDED LINE MARKING SYSTEM
LASER GUIDED LINE MARKING SYSTEM
LASER GUIDED LI

SX Laser Guided Line Marking

Key Advantages

- Perfect laser straight lines every time
- Up to 3 times faster than conventional line marking
- 1.5 up to 6" line marking width
- No more string lines or 3,4,5 triangles
- Auto spray cut off
- Multi-surface operation
- Compatible with Fleet paint range
- Full maintenance & support service available
- Compatible with eROK line marking vehicle
- 1 year manufacturers warranty, up to 5 years available

The BeamRider, laser guided line marking technology offers a unique opportunity to combine speed and quality without compromising either. BeamRider removes any need for strings or 3:4:5's by using laser technology. The system is designed to be simple, controlled and easy to use. Once the lasers and reflectors are positioned, simply lock the BeamRider onto the laser beam and walk forward. The actuator automatically adjusts to remove any human error.

The BeamRider can move up to 8.5 inches (22cm) and still maintain a perfect straight line. The BeamRider system eliminates any risk of error with the automatic cut-off system. If the operator deviates too far from the laser beam, the spray machine is switched off.

CT

- 1 x 90° Laser transmitter
- 1 x Transmitter carry case
- 2 x Reflector plates
- 1 x Transmitter base plate
- 1 x Battery charger for transmitter
- 1 x Patented actuator unit
- 1 x Kombi spray unit
- 1 x Battery charger for Kombi unit
- 1 x Knib (paint nozzle & guidance assembly)
- 1 Year manufacturers warranty
- Up to 5 year warranty available

SX

- 2 x Laser transmitters and telescopes (1 x 90° and 1 x Single laser unit)
- 1 x Transmitter carry case
- 2 x Reflector plates
- 2 x Transmitter base plates
- 1 x Battery charger for transmitters
- 1 x Patented actuator unit
- 1 x Kombi spray unit
- 1 x Battery charger for Kombi unit
- 1 x Knib (paint nozzle & guidance assembly)
- 1 Year manufacturers warranty
- Up to 5 year warranty available

The BeamRider, laser guided line marker can be used in conjunction with the eROK ride on machine. This makes for the quickest and easiest way to produce laser straight perfection.

GNSS GUIDED LINE MARKING SYSTEM

THE ONLY BRITISH COMPANY THAT MANUFACTURES
A SATELLITE GUIDED LINE MARKING MACHINE

“ ... Fantastic, cutting edge, time saving equipment! ”

Dave Cope - Owner
Nobridge Nurseries

“ ... Minimum effort, maximum results! ”

Will Hancock - Regional Manager
Countrywide GM

“ ... I can initial mark a full sized football pitch in 20 minutes, on my own! Last week I initial marked over 25 miles of lines, the previous year that took two men four weeks. The results have left us speechless! ”

Mike Lewis
Highground Maintenance

THE NEW ERA IN LINE MARKING

GNSS GUIDED LINE MARKING SYSTEM

USER INTERFACE

A friendly and simple to use control panel.

SOFTWARE

Accurate +/- 1cm. (under normal conditions).

HARDWARE

Patented automated arm corrects errors automatically.

Nozzle switches on and off automatically.

Recirculation controlled from tablet to eliminate air locks.

Patented anti-blockage system - **The Flozle**. (see below)

Patented liner bag system to keep paint fresh, and machine and operator clean.

MANAGEMENT SYSTEM (patented)

Monitors productivity.

Stores pitches marked.

Design tool.

Usage rates and many other features.

COSTS

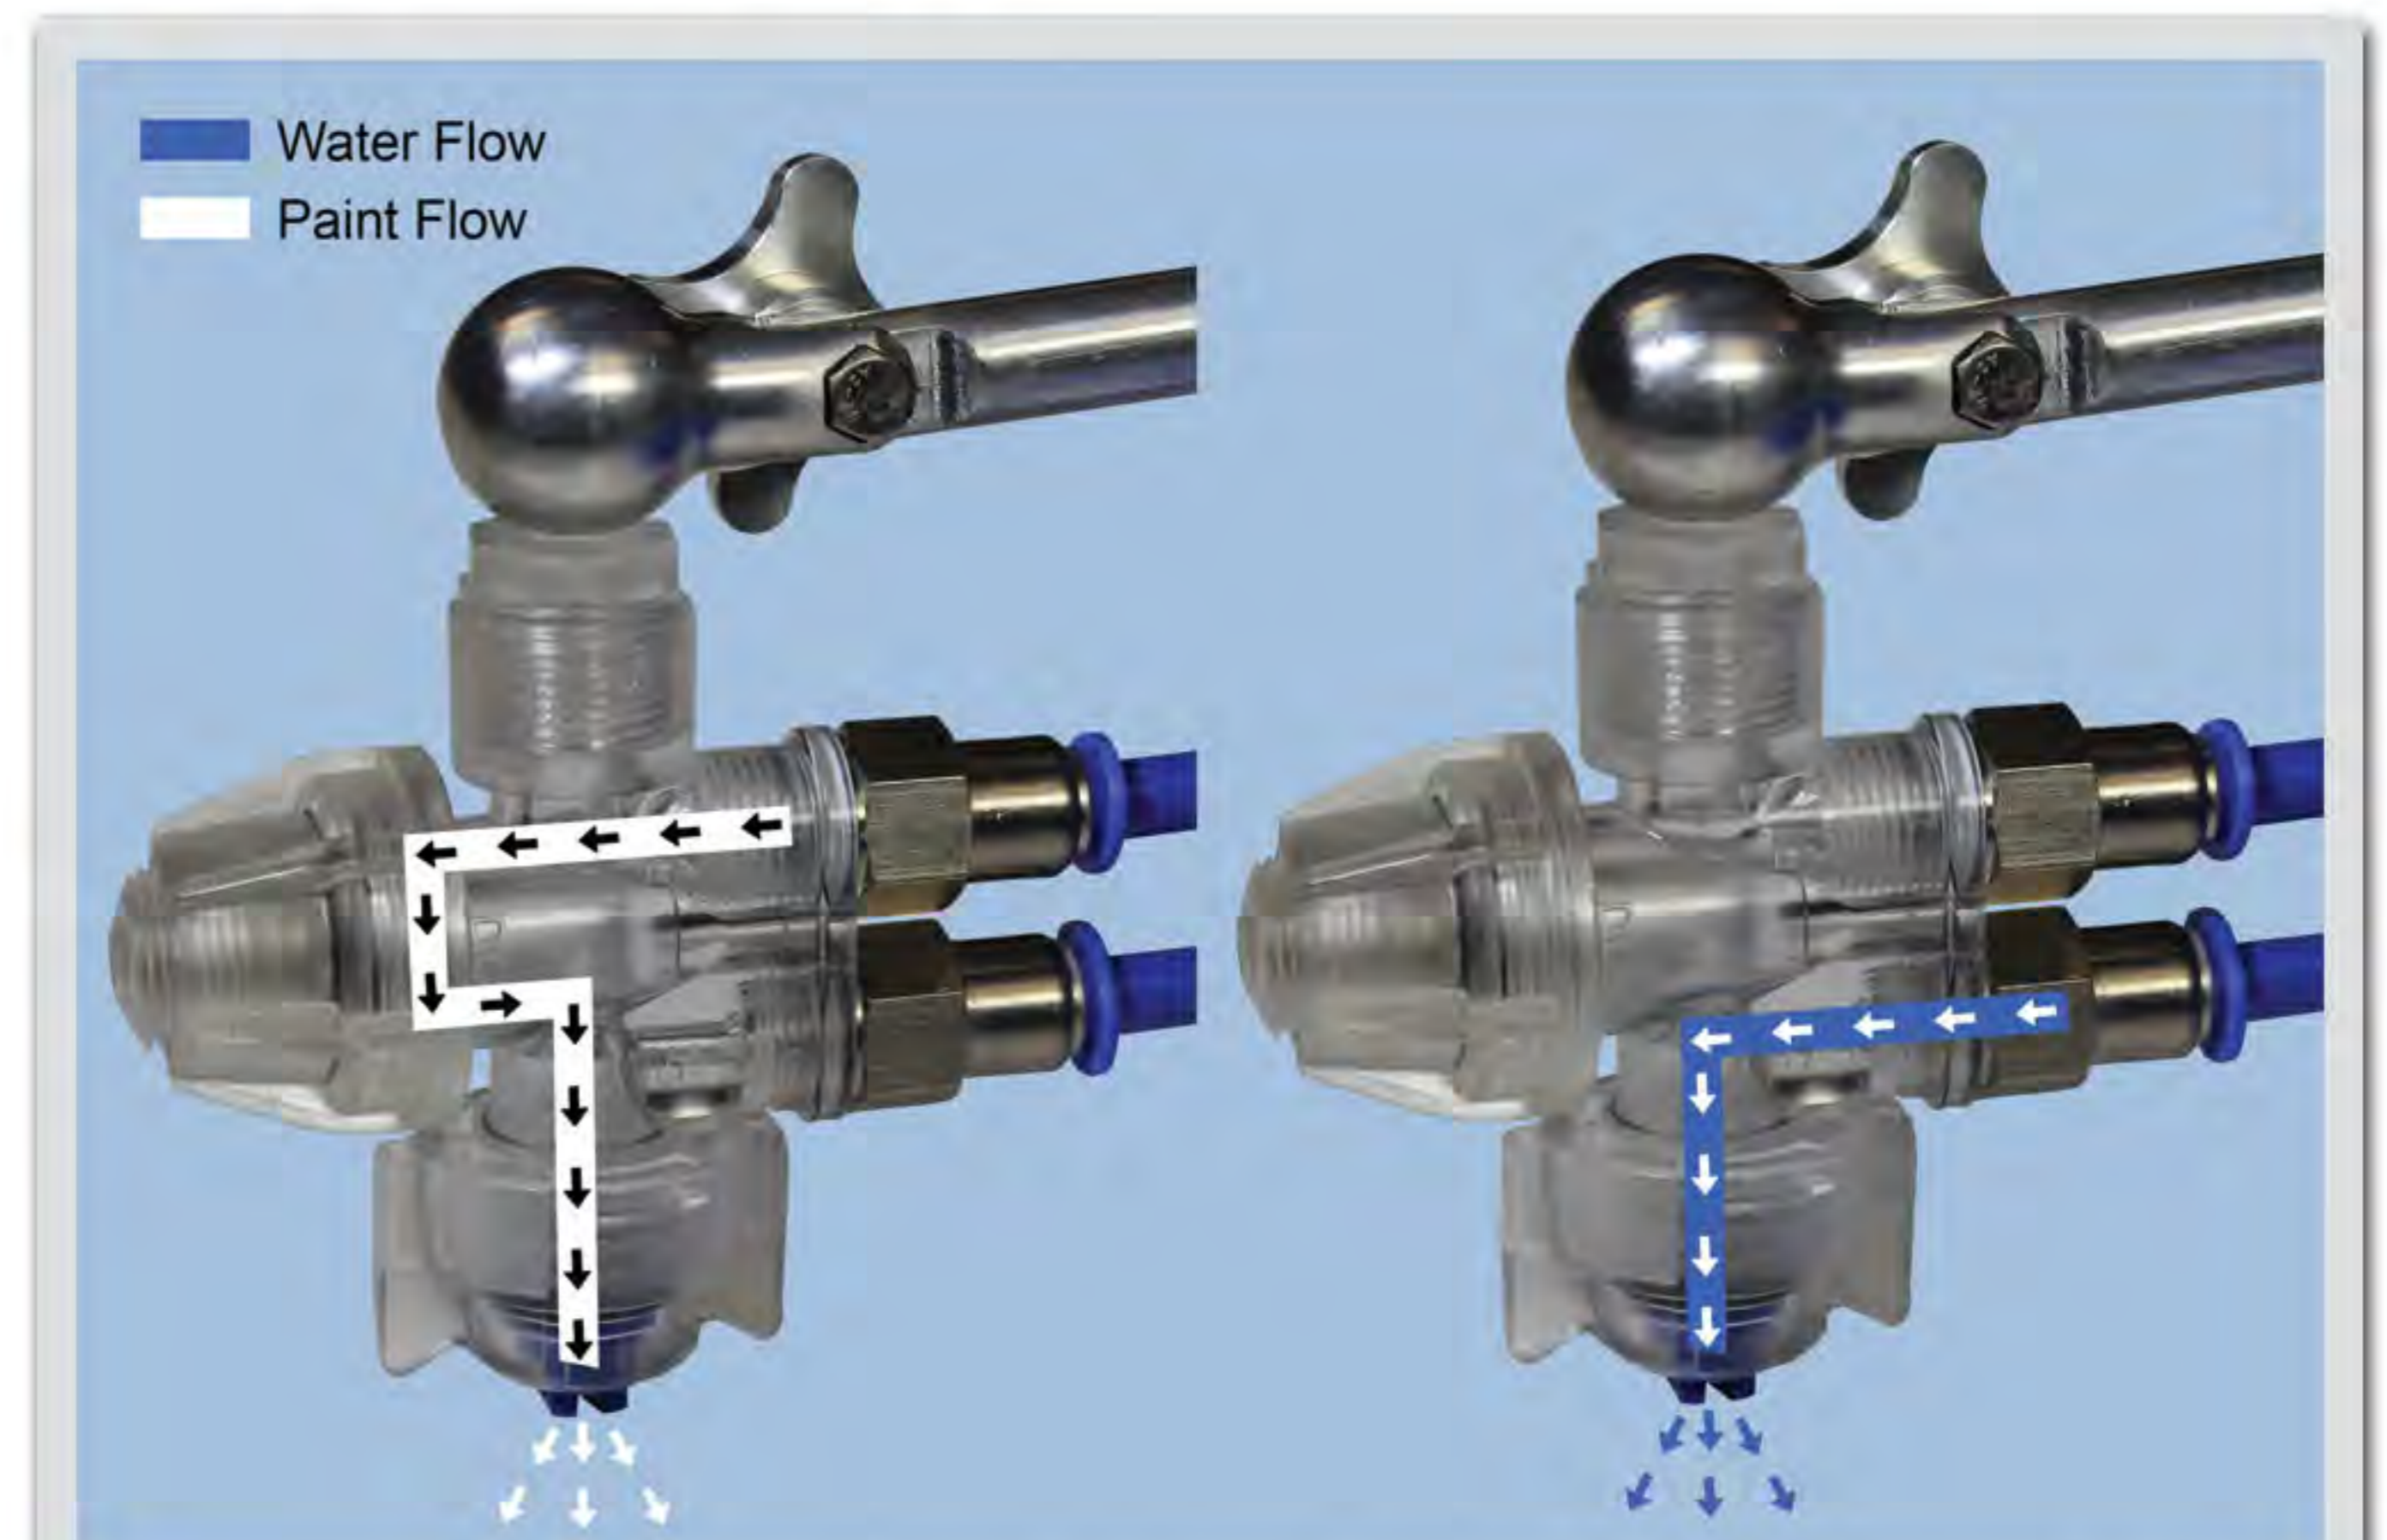

All costs are included in the deal including paint.

There are no extra costs outside the contract eg.

software updates are free, any RTK correction signal free, no sim cost.

BACK UP AND WARRANTY

The MAQA Marking Machine is guaranteed for life! this includes battery, fair wear and tear, actuator slide, wheels and pump for more details please look online or call our sales team on 01684 573535.

The flozle nozzle system is a spray head that automatically cleans the nozzle after every line marked. This unique patented system (GB2511372B) (EP3079831A1 pending) can keep the line marking tip clear at all times. Fleet have automated this procedure, as well as making it available by choice to the operator. Other advantages are cost savings, up to ½ litre of paint can be wasted when flushing a nozzle tip through a standard spray marker, whereas the Flozle uses the equivalent of 2 teaspoons.

When choosing a machine like MAQA the backup and warranty are essential. This is where an ecommerce site with little or no back up is not any help when you are stuck in the middle of a field and your machine has broken down. Fleet have a team of sales and technicians, over 20 at present, in order to cover all eventualities with a 60 year + reputation. See cover to read testimonials of MAQA users.

FASTLINER

Ride-on marking system

Features Include

- 50, 75, 100, 120mm line marking width
- 150 Litre paint tank
- Seperate water tank
- Side marking
- Unique sliding arm
- Heavy duty pump
- Significantly reduces operational costs

The Fastliner ride-on-system offers the customer a number of key advantages. The Fastliner has been developed to cut down marking time which reduces cost. Primarily targeted at the customer with a number of sports fields to mark out, the Fastliner has become a real winner around the world.

A 150 litre tank is mounted on the back of a utility vehicle or ATV. The paint tank is calibrated in litres and US gallons to help provide accurate mixing and cost control. Mounted on the side of the vehicle is a retracting arm on which the spray assembly is attached. This arm eliminates the need to reverse the vehicle when marking up to and around goal posts. The arm can be extended and retracted to keep the vehicle on the same driveline all the way along the line. The spray head, very importantly is downward facing at all times.

On the bottom of the retracting arm is the line forming 'ski'. This provides excellent line definition and allows the option to change line widths in seconds.

The Fastliner ride-on-system uses a bespoke paint called Fastline, supplied in 15 litre drums or 1000 litre multifills, very rain resistant with a high dilution rate.

Pitch Type	Pedestrian (mins)	Fastliner (mins)
Football Pitch	20	7
Rugby Union / League	30	8
Hockey & Tennis	20	7
Rounders	8	4
American Football	120	40
Five-a-side Football	10	4
400m Running Track	100	25
300m Running Track	60	20
200m Running Track	40	15

GRASS PAINTS

CONCENTRATED PAINTS FOR
ALL NATURAL GRASS SURFACES

CONCENTRATED MARKING PAINTS

Bright white, rain resistant and long lasting - who could ask for more?

Fleet's range of field marking paints for spray machines offer the ultimate in performance and reliability. Designed with grounds staff and sports turf management in mind, the Fleet product range disperses instantly in water removing the unnecessary downtime of mixing.

The products have been developed not to fall out of suspension preventing the liquid from going hard in the bottom of the machine or drum. Instead, the products only offer 'soft settle'; therefore allowing the product to be easily re-mixed back into the water.

Fleet offer a product to suit every groundsman's needs.

HARD SURFACE PAINTS

THE PERFECT PAINTS TO MARK AND ZONE
ALL TYPES OF HARD SURFACE

HARD SURFACE PAINTS

Bright, vibrant, highly durable and a minimal environmental impact...

Permanent Marking Fluid (PMF) is our water based hard surface marking paint. PMF offers all the great features of our grass marking paints along with some additional properties beneficial to hard surface marking. PMF provides a bright, bold, crisp line when applied through either the BeamRider or the Kombi line marker.

When on the ground PMF gives a surface coating with minimal impact on the playing surface providing a much better consistency of bounce or slide for various sports. PMF has a remarkable durability of 18 months to 2 years when applied correctly and is a fraction of the cost of some alternative systems. It is easily dispersible with water, reducing the time taken when flushing through the machine after marking.

The water based nature of PMF also provides complete peace of mind when considering the environmental impact.

PERMANENT MARKING FLUID

The best solution for hard surface marking with up to 100 linear metres of marking with 1 litre of paint when used with the Kombi or BeamRider.

SADDLE BAG

Allows 2 x 5 litre drums to be carried and used so the main tank is left clear of Hard surface and Synthetic paints.

AEROSOLS & AEROLINER 5

Our range of aerosols will never let you down! Available in White, Orange, Red, Blue, Yellow, Black and Green. 750ml cans with Line-forming nozzles.

HARD SURFACE ZONING

HSZ is a durable coating for Macadam sports surfaces such as tennis and netball courts. It meets the slip requirements of SAPCA, LTA and ITF when correctly applied and maintained.

HSZ is a water-based, single pack, acrylic that gives a matt, non-reflective textured finish. Colours available are Terracotta, Medium Green, Dark Green, Medium Blue and Dark Blue.

SYNTHETIC SURFACE PAINTS

LINE MARKING PAINTS FOR ALL TYPES OF SYNTHETIC SURFACES

SYNTHETIC SURFACE PAINTS

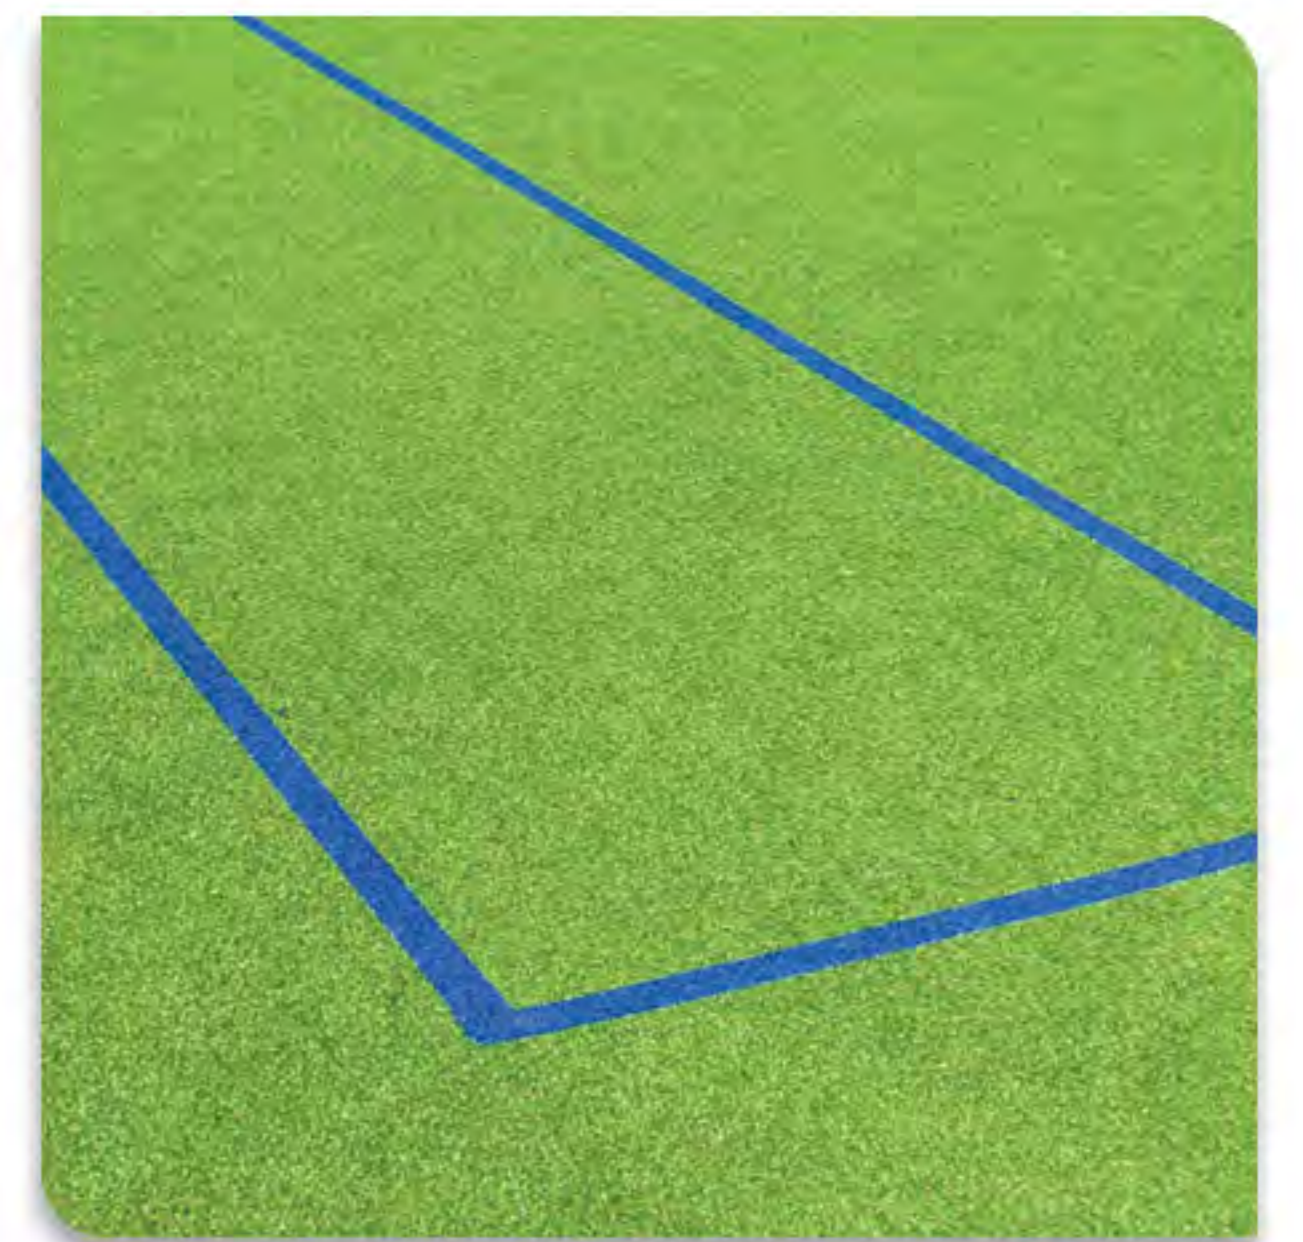

Making synthetic fields look bold and game ready.

Synthetic Turf Coating (STC) is our water based synthetic surface marking paint. STC, like all our paints, benefits from easy dispersion resulting in trouble free mixing. STC has been created specifically for synthetic surface marking. Synthetic manufacturers, installers, purchasers and users alike are constantly looking for ways to achieve the nearest thing possible to a natural playing surface. STC gives bold, vibrant colours and creates a much more natural line than any stitched in option.

For the best application results, we recommend the BeamRider automated laser guided line marker.

SYNTHETIC TURF COATING

The best solution for synthetic surface marking.

- Extremely bright
- Economical
- Rain resistant
- Long lasting
- 5, 10 & 12.5 litre drums

SADDLE BAG

Allows 2 x 5 litre drums to be carried and used so the main tank is left clear of Hard surface and Synthetic paints.

READY TO USE PAINTS

ARE YOU READY?
BECAUSE WE ARE!

READY TO USE MARKING PAINTS

Are you ready? Because we are!

Fleet's range of ready to use paints are second to none. For the greatest impact we recommend using DROO closely followed by our FORT paint. All our ready to use paints will flow easily through fine nozzle tips on all spray machines.

DROO is at the top of our range of ready to use paints, it is extremely fast drying and gives the brightest white line by using the best raw materials. For the greatest impact, use DROO!

FORT has similar characteristics to DROO and will give excellent results on grass and muddy fields.

ACCESSORIES & OPTIONAL EXTRAS

GET MORE OUT OF YOUR MACHINE WITH
OUR ACCESSORIES

ACCESSORIES & OPTIONAL EXTRAS

Make your machines do more!

Fleet offers a range of accessories, as optional extras, that can be ordered to help with your line marking needs. From initial marking kits through to multi lane spray booms, Fleet's range has everything you need for the world of line marking.

ADJUSTABLE SPRAY BOOM

With an adjustable five height position, easy push-on and pull off boom along with a 1.5 metre spray width, the spray boom offers the user an advanced spray system at an affordable price.

ATHLETIC BOOM

Athletic track lane marking becomes easy with the athletic boom. Just clip on the boom and mark two, three, even four lanes at once. Lane width is totally adjustable and folds for transport purposes.

SADDLE BAG

Allows 2 x 5 litre drums to be carried and used so the main tank is left clear of paints.

HAND LANCE

The hand lance is the ideal optional extra for spot spraying and filling in areas that are difficult to reach.

KOMBI KLEAN

Kombi Klean helps to flush the pump and pipework etc clear of paint after using the Kombi line marker.

30M GROUNDSMAN TAPE

Specially designed for smaller courts in mind, like tennis, netball and cricket, the Groundsman is a must have tool for all grounds staff.

INITIAL MARKING KIT

The kit includes everything you will need to set out your given pitch.

NOZZLE TIP CLEANER

Using a cavitation effect caused by high frequency ultrasonic wave vibrations in the fluid, providing an effective solution for the removal of paint, dirt and grime which would normally require tedious manual cleaning by hand.

FLEET WIPES

Our Fleet Wipes offer an easy solution for the removal of high quantities of paint with little effort or output. A beaded surface ensures even the most stubborn hardened paint can be removed with ease.
